

Standard Features:

- Industrial strength for high volume production jobs of up to 1 million forms per month
- Air-Feed System deck and pump allow for cut-sheet processing of perforated forms
- Variable speed up to 30,000 sheets per hour
- Designed specifically to burst perforated cut-sheet forms
- Continuous loading air-feed system
- Six-digit resettable counter for audit control
- Conveyor w/photo-eye for neat and sequential stacking
- Static eliminator
- Jog capability
- Safety interlocks

Bottom-feed air system for continuous loading of cut-sheet forms

The FD 4400 industrial strength cut-sheet burster is specifically designed to process Check21 IRD's and other documents printed on perforated cut sheets. The FD 4400 sets the benchmark as the only high-volume cut-sheet burster capable of processing up to 30,000 forms per hour and up to one million forms (input) per month. The FD 4400 utilizes a bottom-feed air system, allowing operators to continually load forms to maximize efficiency and throughput.

The FD 4400 is the ideal solution for any bank or processing center which needs to process a high volume of IRD's or any other form with multiple documents printed on a single sheet which need to be burst apart.

Options:

- High-capacity Drop Stacker

Specifications

Variable Speed:	Up to 30,000 sheets per hour (11")
Duty Cycle:	Up to 1,000,000 forms per month (input)
Feed Tray Capacity:	Up to 500 sheets 20# paper
Paper Size:	2.75" – 17" W x 2.75" – 17" L
Dimensions:	42" H x 33" W x 64.5" - 78.5" L
Power:	110V, 50/60 Hz, 30A dedicated line required
Weight:	Approx. 525 lbs.
